OVERVIEW**

YOU

THE RESEARCHER
The center of what we do

CONSULTATION

Helping & advising on solutions tailored to your research with application support, demonstrations & trials.

PREMIUM QUALITY

Product quality assurance through CE certifications, an average ten-year life span, & comprehensive three-year warranty.

SERVICE SUPPORT

Service team provides yearly preventative maintenance, troubleshooting support, off & on site repairs & loaners to prevent downtime in the lab.

INSTALL & TRAINING

Helping you become more familiar with your new product with on-board training & ensuring your product remains at peak performance with check-ins & health days.

EVAPORATION

Backed by 30+ years of expertise, Hei-VAP rotary evaporators deliver cutting-edge performance for efficient solvent evaporation in laboratory and industrial environments.

- Engineered for simplicity and precision, combining accurate temperature control with reliable vacuum performance to streamline solvent removal.
- Ideal for a wide range of applications, including:
 - Purification & separation of reaction products
 - Solvent removal
 - Concentration, powder drying, and extraction of natural products
 - Environmental & food safety testing

CE
Certified

the **Evaporation Lineup**

Hei-VAP BENCHTOP ROTARY EVAPORATORS

Engineered to master the full spectrum—from basic evaporation to higher volumes—with intuitive control, intelligent automation, and rock-solid reliability all in a compact benchtop design.

2.5 L - 85 L
EVAPORATION PER DAY
when paired with Hei-VOLUME Distimatic Pro

Accommodates 50 -
5000 ml flask size

Unmatched system
vacuum tightness

Patented clamping
sleeve alleviates glass
on metal connections,
preventing stuck
vapor tubes

Hei-VAP Models:

	Core	Expert / Ultimate	Control
Digital display set / actual bath temp and rotation speed	✓	✓	✓
Timer		✓	✓
Max. temperature limitation		✓	✓
Solvent Library			✓
Integrated control of vacuum pump and chiller			✓

COMPLETE THE PACKAGE

Our full selection of Hei-VAC vacuum pumps and Hei-CHILL chillers are engineered for seamless compatibility with both benchtop and industrial-scale rotary evaporators.

VACUUM PUMPS

RPM or valve regulated pump options to fully
optimize your evaporation

CHILLERS

Award winning thermostat range to quickly and
accurately achieve optimal cooling temperatures for
benchtop and industrial evaporation.

Hei-VAP INDUSTRIAL ROTARY EVAPORATORS

Perfectly designed for a great deal of different distilling processes, from standard evaporation without vacuum control up to complex distillation processes with vacuum control.

Evaporates up to 350 L per day

Automatic water bath refill system

Easy to use panel to help you set optimal parameters and safety features

HEIDOLPH EXCLUSIVE

AUTOMATED EVAPORATION

Hei-VOLUME DISTIMATIC PRO

Integrated Module for Benchtop and Industrial Evaporator

Saves time. Increases throughput. Reduces costs.

Hei-VOLUME Distimatic Pro automates feeding, distillation, and drainage for truly unattended operation. When paired with a Hei-VAP Industrial, it offers a flexible alternative to oversized 50–100 L evaporators—maximizing efficiency and return on investment.

50+ L EVAPORATION PER DAY

For full infographic please visit heidolph.com

SEAMLESS INTEGRATION Hei-CHILL BASECART CHILLER

Save space without compromising cooling power

10 L - 350 L EVAPORATION PER DAY

when paired with Hei-VOLUME Distimatic Pro

PARALLEL SAMPLE EVAPORATION

Scan here to learn more about Parallel Sample Evaporation

miVac

Cost-Conscious, Small, Simple Centrifugal Concentrator

Dry Low Volumes Water or Solvent.

EZ-2 4.0

Versatile, easy to use all in one parallel sample evaporator.

Supports a broad range of sample formats and solvents.

HT Series 3i

Scalable High Throughput small sample parallel evaporation

3-6x the capacity with the same compact footprint.

STIRRING & HEATING

OVERHEAD STIRRERS

Small but Fierce, Hei-TORQUE overhead stirrers offer an all-purpose stirrer that provides the best mixing results even for very challenging applications. Choose from our Core, Expert, and Ultimate models to find the torque that best suits your application.

CE Certified

3 Year Warranty

Safety

QUICK CHUCK

The Integrated Quick Chuck allows for one-handed stirring blade changes without any tools, saving both time and costs.

EFFICIENT MIXING

The ability to change direction enhances mixing for suspensions or dissolving, ultimately saving time in Ultimate 100 and 200 models.

START & STOP

The Start/Stop Button prevents unintentional device activation, ensuring safety.

SAFETY SETTINGS

Safety settings, including start speed and torque limit, are maintained within specific limits to prevent spilling when starting the Hei-TORQUE.

MAGNETIC STIRRERS

Backed by **Heidolph's exclusive 10 year warranty**, the Hei-PLATE Mix 'n' Heat hotplates offer industry leading safety, accuracy and efficiency for all your applications.

HEAT-ON-BLOCK

Safety for your laboratory

Replace the heating baths and heating mantles in your laboratory and reduce the risk of fire and burns.

E-LIFT

Electronic lab jack e-Lift to provide extra safety in case of an error and to realize automated reactions.

Compatible & controlled with Hei-PLATE Mix 'n' Heat Ultimate magnetic stirrer.

FINDENSER™

Waterless Condenser that utilizes air instead of water providing safety and sustainability for your laboratory.

STARFISH

Multi-reaction block allows you to process numerous reactions on a small footprint at significantly reduced process times.

UNIQUE KERA-DISK®

The 145mm Kera-Disk® plate combines ceramic for chemical resistance with aluminum for rapid heat-up, optimizing processes with superior thermal conductivity and durability.

DIE-CAST HOUSING

The fire-resistant die-cast housing prevents damage to inner components, providing outstanding protection against heat, chemicals, and falls.

SAFETY CIRCUITS

With two independent safety circuits, the heating function shuts off in case of overtemperature, minimizing the risk of accidents or fires.

SHAKING & VORTEXING

The Hei-SHAKE line offers 6 different movements for all of your applications: **orbital, vibrating, 3D, rocking, reciprocating and overhead.**

PLATFORM SHAKERS

Platform shakers with various movement types and weight capacity

VORTEXERS

Whether it's for solubilizing solids, resuspending of cell pellets, or simply mixing individual samples in test tubes, a vortexer always plays a central role in every laboratory

OVERHEAD SHAKERS

Overhead shakers are suitable for various applications, offering the ability to evenly mix and distribute contents.

Scan here to learn more about the Hei-SHAKE line

INCUBATOR 1000

Seamlessly integrate your 1000 series shaker with Heidolph's modular Incubator 1000, allowing for simultaneous tempering and optimized lab space.

NEW LINEUP! Hei-SHAKE ORBITAL CORE

The Hei-SHAKE Orbital Core drives progress in every lab. With a wide speed range (1–530 rpm), precise 20 mm orbit, minimal self-heating (+1.5 K), and remote-control capability, it ensures optimal conditions for sensitive samples and reproducible results. Designed for safety, reliability, and user comfort, it supports applications from cell cultures to solubility studies.

Hei-SHAKE Orbital Lineup

LIQUID HANDLING

Hei-FLOW PERISTALTIC PUMPS

Efficient pumping and precise dosing, even using corrosive, sterile and viscous media.

Mix and Match - Achieve your desired flow rate:

1. Select the pump drive for individual requirements (Core, Expert, Ultimate) for volume transfer or precise dosing, analog or digital remote control
2. Select the pump head for individual requirements (single or multi-channel for individual applications)
3. Choose tubing for your desired flow rate and medium

LONG-TERM DURABILITY

Long term durability means that your pump will last years without needing to be replaced.

ISOLATED MEDIA

Pumped media never comes in contact with the pump head, drive, or user, eliminating the risk of cross-contamination.

3 Year Warranty

Safety

WATER PURIFICATION

Scan here to learn more about Water Purification Solutions

Choose your laboratory water purification system with confidence:

AVIDITY
SCIENCE
AN ATS COMPANY

TYPES OF PURITY:

Type I UltraPure
18.2MΩ·cm

Type II Deionized (DI)
1 - 15MΩ·cm

Type III Reverse Osmosis (RO)
<40µS/cm

Up to 98% rejection of incoming feedwater inorganics, typically

Solo™ S

Features reusable cartridges, helping to cut down waste and reduce your carbon footprint.

Type I

Geno™ II

User-oriented deionised (DI) water purification system for laboratories and hospitals

Type II

Duo™ II.I

The 2-in-1 compact water purification system lowering operational costs while maximising laboratory space

Types I & II

NEW REACTOR STATIONS

HEI-REACT | LAB REACTORS

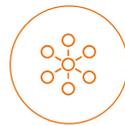

Heidolph's first laboratory reactor, effortlessly guiding you from small-volume discovery to larger-scale reactions.

Unique Ergonomy

Maximum Efficiency

Unlimited Flexibility

SEAMLESS INTEGRATION

WITH HEI-TORQUE

Precise alignment with the Hei-TORQUE overhead stirrer line. Ensures uniform mixing and high process stability – even with highly viscous media.

INNOVATIVE REACTOR STAND

The stirrer and lid can be swung to the side, allowing easy access to the reaction vessel.

The ergonomic telescopic stand ensures convenient height adjustment and safe operation – even in compact fume hoods and easily with just one hand.

Vessel Volume Range	100 ml to 500 ml	1 to 5 L *requires additional tripod stand when using 1L to 5L
Vessel Type	Single jacketed process vessel or vacuum jacketed process vessels	
Lid Size	DN100 - 5 Neck lid with 1xB19 2xB24 1xB29 1xB34 vacuum-tight	
Temperature Probes & Impellers	Coordinated based on vessel size	
Thermoregulator/ Vessel Temp Range	-70 to 230 C	
Dimension (w x d x h)	540 x 538 mm x 1220mm

VESSEL, MANIFOLD & DRAIN KIT

Heidolph partnered with Radleys to provide the #1 preferred choice in reactor vessels. Backed by more than 50 years of scientific glassblowing.

POWERED BY radleys

- Process vessel geometry with 1.25 to 1 ratio of internal height to internal diameter, with dish shaped base
- PEEK hose couplings allow for tool-free connection and disconnection in seconds.
- The drain-down kit enables fast and controlled draining of the thermal fluid, ensuring clean and effortless vessel exchange

ONE REACTOR. UNLIMITED CONFIGURATIONS.

Heidolph's modular system adapts to your needs with preconfigured packages. The Hei-REACT Base configuration showcases unlimited modularity—research made easy.

AUTOMATION & SOFTWARE
